TO THE TRADE.

Although we have changed the name of our Firm, the ownership and management remain the same.

It will be noticed that nearly all the styles in this catalogue are new.

We shall endeavor, as heretofore, to please our customers by careful attention to every department of the manufacture of our Rockers, and in the selection of timber, carpets, plushes, varnishes and other materials.

All our Rockers and Folding Chairs are shipped in the **Knock-Down**, and packed in crates or boxes, which insures **low rates of freight**, and prevents marring in transit. As you will see by examining page 52, our Rockers are easily set up. We **make no charge for Crates**; but charge actual cost for boxes. **No charge for Cartage.**

We ship all goods released unless otherwise instructed, as goods not so marked will not be taken by the Railroad Companies, except at high rates of freight.

We wish it distinctly understood that our responsibility ceases when goods are receipted for **in good order** by transportation companies, and all claims for freight overcharges or damages to goods while in transit must be settled with the carrier. While we are willing to assist in collecting such claims, they must in no case be deducted in settlement of our bills.

Terms, net 30 days, payable by New York or Boston exchange, or P. O. Money Order.

Very Respectfully,

H. C. DEXTER CHAIR CO.,

Formerly DEXTER & CO.,

Successors to Dexter & Scott, and Poor, Dexter & Co.

JUNE 1ST, 1889.

BLACK RIVER, JEFF. CO., N. Y.

 Upholstered same as No. 192.
 Brass Casters with each chair.

This cut shows the Dexter Rocker in the K. D. for packing. Shipped in this way, packed in crates or boxes, enables us to secure the lowest freight rates, and prevents marring in transportation.

If careful in observing the following, no difficulty will be found in setting up any of our Rockers :

In setting up the floor Rockers, first put in the screws, then drive the rockers on in glue.

In setting up the *Platform Rockers*, first put the large screws through the front seat roll, and fasten it firmly to the bent arms, then put the top on the base.

A little oil or beeswax on the tip of the screws will greatly facilitate their entry into the wood.
